

Video/Multimedia Specialist

Description

If you've got a great eye for design, the skills to back it up, and love to work with fun, creative folks (+their dogs), then you've found the right place. Sound good? Then read on, dear applicant. READ ON!

Codleab LLC. is looking for a designer/motion designer to help us up our game. Someone who is a creator of things that make the whole world jealous and is ready to push work past good and into great.

Responsibilities

Some days that means working on sleek, tightly-structured designs for tech, financial, and other corporate clients. Others, it means inventing interesting characters and vibrant, tactile worlds filled with abstract shapes, video flyers, video corporate profile, Explainer vids, title sequences, event promos, logo opens, marketing, branding, social content... it all falls under what you'd be creating here.

While our ideal candidate is both a great designer and an experienced animator, the priority here is design. So if getting that composition juuuust right satisfies you to your very bones, but actually making it move ain't really your bag, that's okay... we'd still love to hear from you.
